PROFESSIONAL EXPERIENCE

Independent Web Developer / Self-Directed Developer

2024 – Present | Douala, Cameroon

- Consistently self-taught web development since 2024 through structured learning, documentation, online courses, andhands-on project development.
- Built practical web applications to strengthen frontend, backend, database, API integration, responsive design, andproblem-solving skills.
- Currently studying at Seven Advanced Academy in Douala to sharpen software development skills, deepen technicalknowledge, and gain a stronger professional foundation.
- Develops modern, responsive, and user-focused interfaces while applying clean development practices and attention tousability.
- Combines web development with graphic design and digital marketing knowledge to create digital solutions that are bothtechnically functional and visually engaging.
- Uses Git/GitHub and modern development tools to manage projects, experiment with new technologies, and continuouslyimprove coding skills.

SELECTED PROJECTS

Drivana : Online Car Booking & Marketplace Web Application

A modern web application designed to simplify discovering, purchasing, and booking cars online. Drivana provides users with a convenient digital experience for browsing available vehicles, reviewing information, and completing booking or purchasing actions with minimal friction.

Faves Touch : Hairstyle Discovery & Braiding Booking Platform

A web application that makes hairstyle discovery and braider booking easier. Users can browse different hairstyles, explore available braiders, select a preferred style and service provider, and book an appointment through a simple, organized digital experience.

Goshen Provision : Online Provision Store & Ordering Platform

A web application for a local provision shop that lets customers browse food and household essentials and place orders online. Goshen Provision is designed to improve customer access and support the shop as road construction disruptions and increased local competition affect business.
